on Binance Smart Chain.

# 1. INTRODUCTION

## OUR VISION

The Reality: The B&C landscape is saturated with projects that promise utility "coming soon" but launch with nothing but a roadmap.

Investors are often exposed to unsafe contracts, sniper bots, and zero real-world value.

The ApeXplorer Solution: We flipped the script. We built the product before asking for capital. ApeXplorer is a safe, audited, and utility-driven protocol launching with a fully functional DApp from Day 1. Our mission is to provide a secure "One-Stop-Shop" for investors to Buy, Earn, and Track their assets seamlessly.

## 2. THE ECOSYSTEM

### The All-In-One DApp

Unlike simple staking tokens, ApeXplorer offers a comprehensive Dashboard ([app.apexplorer.com](http://app.apexplorer.com)) combining three core pillars:

1. Integrated Trading Hub (BUY) We have eliminated the friction of external exchanges.

Instant Swap: Users can buy and sell APEX directly within our DApp via the integrated PancakeSwap interface.

Secure Routing: Trades are executed securely through the official router, ensuring the best rates and safety.

2. Proprietary Staking Protocol (EARN) Holders can lock their assets to earn passive income, fueled by transaction fees.

Silver Tier: 2 Months — 8% APY

Gold Tier: 4 Months — 12% APY

Platinum Tier: 6 Months — 16% APY

3. Portfolio Intelligence (TRACK) Real-time data integration with DexScreener allows users to monitor Price, Market Cap, and USD Portfolio Value instantly.

## 3. SECURITY ARCHITECTURE

### Engineered for Safety

Our custom-coded smart contract goes beyond standard templates to ensure a Fair Launch.

🛡️ **Advanced Anti-Bot Protection** To neutralize "Sniper Bots" that drain liquidity at launch, we have implemented hard-coded restrictions:

**Max Transaction Limits:** Prevents massive instant buys/sells during the initial launch phase.

**Max Wallet Limits:** Prevents whale accumulation to ensure decentralized distribution.

#### 🛡️ Trust Measures

**Audited Code:** The contract has undergone rigorous third-party auditing to certify zero vulnerabilities.

**Verified Contract:** Source code is fully published on BscScan.

**Liquidity Locked:** 100% of initial liquidity is locked via PinkSale for 12 months.

## 4. TOKENOMICS

### Supply Allocation

Total Supply: 1,000,000,000 APEX (1 Billion)

35% — Public Presale: Fair launch distribution via PinkSale.

30% — Liquidity Pool: Permanently locked for trading stability.

15% — Staking Rewards: Locked in the Staking Contract for yield payouts.

5% — Marketing: Strategic partnerships & CEX listings.

5% — Development: DApp upgrades & maintenance.

5% — Core Team: Vested allocation.

5% — Airdrop / Burn: Reserved for community incentives.

## 5. TAXATION SYSTEM The 8% Growth Engine

Every transaction (Buy/Sell) contributes to the ecosystem's sustainability through a smart tax system.

Total Tax: 8% (Slippage 9-10%)

Fee Allocation Purpose

3.0% Staking Injection Auto-sent to the Staking Pool to pay rewards.

2.0% Auto-Liquidity Auto-locked in LP to raise the price floor.
